Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claim 1 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 1:

Line 2, the phrase "a particular device" is confusing since it is unclear as to what "particular" is implied;

Lines 4-5, the phrase "a suitably dampened way the so-called "moving wires" is unclear and confusing because the phrase is not clearly understood as written;

Lines 5-7, the phrase "used in particular structural arrangements which are currently among the most widespread" is indefinite and vague and it is not understood what is being claimed;

Line 13, the phrase "other plants" is unclear because there is no definition as to what "other" defines and/or implies;

Lines 15-17, the phrase "the ends of the pair of "moving wires" (F) normally used in the construction of the said supports" is confusing since it is unclear as to what the term "moving wires" intends to be encompassed;

Lines 17-19, the phrase "when suitably operated in rotation by a suitable tool causes winding and consequent tensioning of the same (F)" is confusing since it is not understood what "a suitable tool" and "the same (F)" define and/or imply;

Lines 20-22, the phrase "said helical spring (i) having turns at some distance from each other so that it can be operated under compression" is vague and indefinite and it is not understood what is being claimed;

Lines 22-25, the phrase "the corresponding first hooking member (2) and second hooking member (3) being applied thereto in such a way as to stress it only by shortening" is unclear and comprehensible; and

Lines 27-28, the phrase "in the appropriate tensioning position" is confusing since it is unclear as to what "appropriate tensioning position" intends to be encompassed.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claim 1 (as best understood) is rejected under 35 U.S.C. 102(b) as being anticipated by Langlie et al. (US 4040604).

Langlie et al. discloses a resiliently compensated wire tensioner, the wire tensioner comprising a suitable helical spring (58) located between a first hooking member (64) and a second hooking member (74) suitable for securing it to a winding

member (14); a suitable immobilising member (16) capable of securing the said winding member (14).
